c) Previous/Next

How to use

Go to the Google Play Store for Android or App Store for iOS and download a VR app (picture A). Install it and open some video or a VR game to test the screen whether can split into two sides (picture B). After you see it works fine, open the top buckle carefully (picture C), and insert your smartphone. Bear in mind that the display should be facing towards the lens. Align the axis and close the cover (picture D). Put the VR headset on your head and adjust the Focus distance (picture E) and Pupil distance (picture F) for the best experience.

Please note that this VR headset is also suitable for people with glasses.
